

Coffee a short guide

Coffee is brewed from the roasted seeds of the coffee plant.

The two most cultivated species are arabica and robusta.

Pour over: a 1 to 16 ratio, about 30 g of coffee to 480 g of water.

Espresso: about 18 g of coffee to yield 36 g of liquid, a 1 to 2 ratio.

French press: a 1 to 15 ratio, steeped for four minutes.

Store beans in an airtight container, away from light and heat.
